MANAGE

BioTime Cloud - Vendor Side is a smart cloud-driven business management system for effective and secured business deals, transactions as well as data management. The system offers innovative functions for running a successful business and helps to connect with your fellow business organizations in the most convenient way.

Features

Real-Time Device Location Tracking
Know the exact current location of a time attendance terminal who works in the region of the country.

Unlimited Scalability
An unlimited number of distributors and System Integrators (SI) can access anytime on a web browser for monitoring their client's time attendance terminal from multiple workplaces and field locations.

Firmware Management
Supports file upload and sending a client's notification of firmware upgrade of their device.

Logo Customization
Distributors and system integrator can choose their company logo and show it on the BioTime Cloud - Vendor Side.

Vendor Management Analytics Dashboard
It refers to the collection of monitoring data of subscribed use and trial user of the client's device globally.

Subscription and Pricing Management
It allows an administrator to manage the subscription price of the BioTime Cloud, admin can set the price to charge customers while subscribed for your product.

License Analysis
It refers to the analysis of "Valid License" and "Expired License". Admin can easily perform an update to their clients and assist its customers to subscribe to the license.
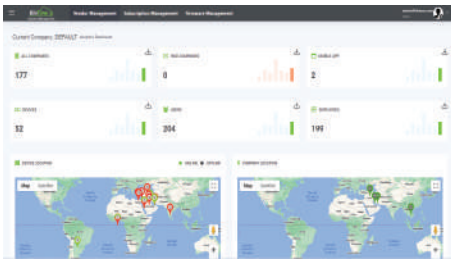

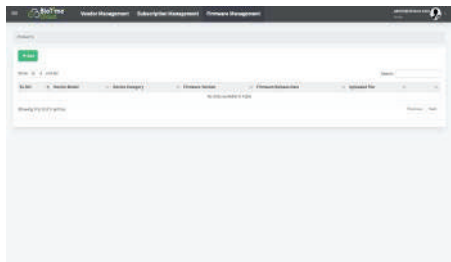

Report Calculation
It helps users to generate summary reports for administrators to view all of the subscribed and client's details of region/location.

Features that Makes Our Solution Effective

Vendor Management

BioTime Cloud - Vendor Side is enabled with a monitoring function that displays number of "subscribed users", "Trial user", "Mobile App User" and "Device" of your clients. Multiple authorized distributors and system integrators (SI) can also access accurate data anytime and anywhere through cloud.

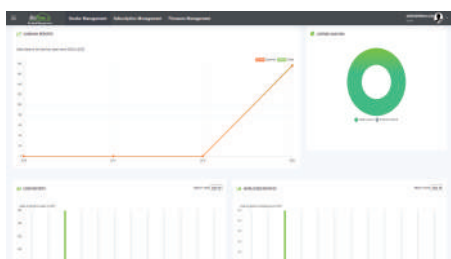

Firmware Management

Distributors can upload the latest firmware through the BioTime - Vendor Side, if the device firmware of subscribed client is outdated, notification icon will be shown in the system, and clients can download the updated firmware for their time attendance terminals.

High-level Security - AWS Cloud Storage

The BioTime Cloud - Vendor Side is powered by AWS cloud technology, which is one of the most flexible and secure cloud computing environments available today. BioTime Cloud - Vendor Side can be accessed from anywhere or anytime via internet-connected devices such as computers or mobile apps by employees or admins.

The company, User and Employee Report

Generate your clients' reports directly without waiting. With BioTime Cloud - Vendor Side, you can generate "customer report", "user report" and "employee reports" in real-time and export in Excel format.

Subscription Management - Price Strategies

It is designed for vendors to manage the subscription price of BioTime Cloud. It helps admin to set the price to charge end-users' subscription for the product.
